	Andre J. Allen	2855				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on app as filed 9-2-03.						
<i>;</i> —	action is non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
closed in accordance with the practice under E	x parte Quayle, 1935 C.D. 11, 45	i3 O.G. 213.				
Disposition of Claims						
 4) Claim(s) 1-12 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-12 is/are rejected. 						
7) Claim(s) is/are objected to.		•				
8) Claim(s) are subject to restriction and/or	r election requirement.

DETAILED ACTION

Claim Objections

 Claim 7 recites the limitation "the receiving unit" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-5,8,9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Inoue in view of Chen.

Application/Control Number: 10/653,653 Page 3

Art Unit: 2855

Regarding claims 1-3,8 and 11 Inoue teaches at least one sensor element (Sb) that is at least partially surrounded by a housing 10, wherein the housing and support of the module is flexible(fig. 11a-11c). However, Inoue does not teach a transmission means for wireless data transmission and a storage unit. Chen teaches a sensor module comprising a transmission means 75 76 for wireless data transmission is integrated in the module and a data storage unit 73. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the sensor taught by Inoue to include a wireless transmitter and memory as taught by Chen for the purpose of storing transferred data, moreover providing mobility and convenience with respect to transmitting data from one place to another with wireless capabilities.

Regarding claims 3 and 9 Inoue teaches voltage for the sensor module wherein an operational inductively coupled in [0049].

Regarding claim 4 the operational voltage for the sensor module is electromagnetically 12 coupled in.

Regarding claim 5 Inoue teaches of one or more flexible foils [0039].

Allowable Subject Matter

Application/Control Number: 10/653,653

Art Unit: 2855

3. Claims 6,10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The cited prior art does not disclose nor suggest a flexible housing capable of being vulcanized into a rubber tire, a gel introduced between the cover and the sensor and a flexible standoff introduced between the support and cover.
